DERMOTAPING

Esthetic BODY Training Program

Professional Training Course for Beauticians and professionals working in the cosmetic field.

Cosmetic and medical non surgical interventions in esthetics.

The course covers the acquisition of DermoTaping skills specific in the treatment care for cellulite, stretch marks, improving skin tone, enhancing elasticity and improving skin conditions. All courses offered by the Institute are specifically designed to acquire the DermoTaping manual skills and techniques assisting in patient care.

Professional target: Doctors, Qualified and specialized beautician, Health care specialists.

Training conducted by

DAVID BLOW

Creator of the Elastic Decompression taping

Training Program

DermoTaping is a totally innovative treatment technique. It is indicated to enhance draining, detoxifying and healing treatments for rapid skin regeneration. This specific dilation taping method is capable of producing tangible results after just a few hours of application with noticeable improvement in skin condition.

The **DermoTaping - BODY** course, lasting 4 days, many treatment protocols targeted to most common needs such as cellulite and stretch marks will be outlined, with further protocols aimed at improving drainage and microcirculation to accelerate skin regeneration and restore tissue tone. This course is highly practical allowing beauticians to master this precious tool and put it into practice immediately, obtaining increasingly satisfying results.

Duration: 4 days (32 hours of hands on training)

Max number of participants: 24

Learning assessment: Questionnaire of 50, questions

and practical test

Course material: Study kit, workbook, tape, scissors.

(value \$ 90.00)

Note: This is a specialization course available to health care professionals working in the area of cosmetic and beautician area.

Visible results in a very short time!

Benefits of DermoTaping

- Improves lymphatic drainage
- Lifting effect
- Cellulare regeneration
- Tonifying and regeneration
- Nourishing and hydrates
- Improves skin elasticity reducing stretch marks
- Assists in weight loss
- Improves microcirculation

DermoTaping BODY

Educational objective: the course consolidates the "know-how" of the theory and the concepts underlying the DermoTaping technique integrated with beautician treatment procedures.

The course aims to correctly develop manual techniques for the application of DermoTaping treatment protocols in particular for body treatments aimed to improve lymphatic drainage and oxygenation of skin tissue. The DermoTaping treatment protocols associated with activation techniques amplify the effect on cellulite, congestion, weight reduction, cutaneous hypotonia and stretch marks. The objective is to improve lymphatic drainage, tissue oxygenation and acceleration of the healing process improving skin regeneration and restitution of skin quality.

The course has been studied and designed to enrich the background of the specialized beautician and health care professional working in esthetics. DermoTaping methodology is a practical hands on learning program that has been in use in Italy for 20 years.

Certification process: the participant will receive a international certificate that enables the treatment with the DermoTaping BODY Esthetics method. Each participant will receive their internationally recognized certification number. Final evaluation will be based on:

- practical test result,
- result of the written test,
- final evaluation of the teacher and tutor.

To pass the exams you need to reach a score higher than 80%, the course will be considered passed according to 3 levels of judgment: passed, excellent, distinction.

Day 1

- DermoTaping. General concepts, theory and application techniques: Elastic -Decompression Methodology
- Type of surgery and developments in the esthetic surgical environment.
- Anatomy, Psychosomatics, Physiology and Dermatology relative to the Dermotaping system
- Lines of maximum skin elasticity and range of elasticity of the upper and lower limb
- · Caution and advice
- Treatment cycles and program evaluation
- Demonstration and practical execution for the upper limb
- Front and rear arm construction
- Treatment of skin and improvement of skin elasticity and tone of upper limb

 Methodologies and Protocols: Application of the abdomen, to strengthen skin tone and treat stretch marks. Support for slimming

Day 2

- Overview of skin elasticity lines and ranges of the Upper limb
- Methodologies and protocols: application for lymphatic drainage
- Methodologies and protocols: application for improving skin micro-circulation
- Examples of aesthetic applications and demonstration and practical execution in the lower limb:
- Foot and ankle
- Calf and internal knee
- Front and back leg and thigh construction
- Possible applications combined with the use of electro-medical equipment used in the aesthetic field
- Nail regeration treatment methods
- DermoTaping activation techniques
 Discussion

Day 3

- Demonstration and practical applications for the lower limb
- Treatment objectives: cellulite, stretch marks, edema control, skin tone
- Inguinal area
- Hips, buttocks and thighs
- Methodologies and protocols: anti-cellulite applications of the internal thighs, posterior and lateral thigh area.
- Methodologies and protocols: ankle and leg lymphatic drainage
- Firming treatment and improvement of skin, thigh, and buttocks skin elasticity

Day 4

- Examples of esthetic applications and demonstration and practical execution in the lower limb
- Posterior leg and Gluteal line
- Methodologies and drainage protocols
- Practical use of application techniques, reasoning on combinations of different applications
- Analysis of case studies and ongoing research
- Assessment of learning
- Written evaluation test and practice assessment test
- Discussion, Final Evaluation and Certification presentation
